

Vaccines Plant

Health Protection Agency

DESCRIPTION

GRC Mott MacDonald were appointed to manage the completion of this strategically important facility, used to manufacture vaccine for the UK Ministry of Defence.

Work included scoping and procuring remedial and additional works and co-ordinating commissioning and validation.

Separately, GRC Mott MacDonald were appointed to carry out validation.

Previously, GRC Mott MacDonald had carried out the front end design of the WFI system and provided consultancy concerned with the specification and procurement of the complex isolator systems necessary.

SCOPE

- Front end design
- Isolator Consultancy
- Project management
- Validation management
- Protocol writing
- IQ/OQ execution
